

Ideation Phase

Brainstorm & Idea Prioritization Template

Date:		Maximum Marks:	50
Team ID:	SWDIT-2026-5503	Project Name:	Implement Client Script and UI Policy

Brainstorming Template Guidance:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

1 Step-1: Team Gathering, Collaboration and Select the Problem Statement

A. Before You Collaborate

🕒 10 minutes

- **Team Gathering:** Defined core team members and assigned facilitation roles for the session.
- **Set the Goal:** Focus on solving client-side data validation gaps and incident priority mishandling in ServiceNow.
- **Facilitation Tools:** Utilized Mural digital whiteboard for sticky note grouping and matrix mapping.

B. Key Rules of Brainstorming

Focus Rules

- **Stay in topic:** Focus strictly on incident form usability & data integrity.
- **Defer judgment:** Accept all client script & UI policy ideas without immediate critique.
- **Go for volume:** Collect maximum functional ideas first, refine later.
- **Encourage wild ideas:** Explore client-side and list-view lockouts.

1. Define Your Problem Statement

🕒 5 minutes

How Might We Statement:

"How might we prevent invalid data submission, automate critical field updates (such as mandatory assignment on high-impact issues), and restrict unauthorized list-view edits in the ServiceNow Incident Management module to improve triage accuracy and response times?"

Team Roster & Contributions

Member Name	Role	Primary Contribution Area
Kokila Manogaran	Lead ServiceNow Developer	Client Scripting (`onChange`, `onSubmit`, `onCellEdit`), UI Policies
Team Member 2	System Analyst	Requirements Definition & Workflow Mapping
Team Member 3	Quality Assurance Lead	Test Case Design & Matrix Verification
Team Member 4	ServiceNow Administrator / Technical Consultant	Platform Configuration & User Acceptance Testing

2 Step-2: Brainstorm, Idea Listing and Grouping

Idea Sticky Notes (Grouped by Clusters)

⌚ 30 minutes

Idea #1: UI Policy Mandate

Make 'Assignment Group' mandatory when 'Impact' is set to High (1).

— Kokila

Idea #2: Urgency Lock

Set 'Urgency' to Read-Only automatically on High Impact incidents.

— Member 2

Idea #3: Auto-Urgency Sync

`onChange` script to set Urgency to High and display info banner on Impact change.

— Kokila

Idea #4: Save Block Script

`onSubmit` script to block incident submission if 'Assigned To' is blank on High Impact.

— Member 3

Idea #5: List Edit Restriction

`onCellEdit` script to prevent state changes directly from the incident list view.

— Kokila

Idea #6: Reverse Condition Logic

Ensure UI policy automatically clears mandates when Impact is reverted to Low.

— Member 2

Idea #7: AI Auto-Category

Predict Incident category using ML based on Short Description text.

— Member 3

Idea #8: Teams Webhook

Send automated MS Teams notification on High Impact incident creation.

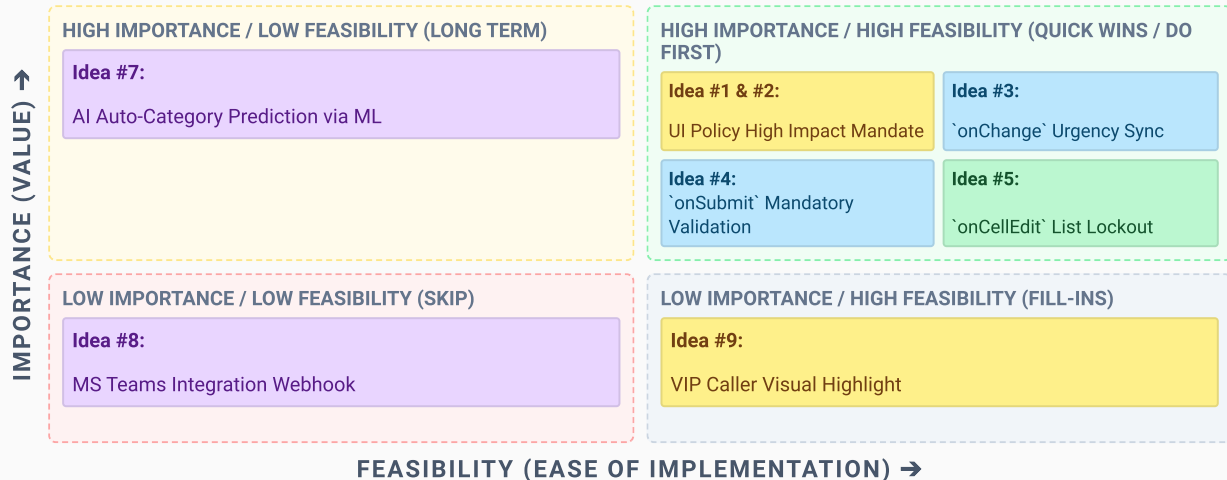

— Member 2

Idea #9: VIP User Highlight

Highlight Caller field in red if Caller is marked as VIP.

— Kokila

3 Step-3: Idea Prioritization (Feasibility vs Importance Matrix)

Prioritized Execution Plan:

ID	Selected Solution Idea	Implementation Method	Priority Level
#1, #2	High Impact Assignment Mandate & Urgency Lock	ServiceNow UI Policy	P1 - High (Must Do)
#3, #4	Auto Urgency Sync & Submission Validation Guard	Client Scripts (`onChange`, `onSubmit`)	P1 - High (Must Do)
#5	List View State Editing Protection	Client Script (`onCellEdit`)	P2 - Medium (Sprint 1)
